

GET A HEAD START

ON YOUR PATH TO RECOVERY

You've had a heart attack. *Now what?*

Participating in a cardiac rehabilitation program is one of the best things you can do next.

Rehab programs are medically supervised to help you improve your health and well-being and change your lifestyle habits through exercise training, education and counseling to reduce stress.

Cardiac rehab helps patients:

Eat better

Return to work & better engage in daily activities

Lose weight

Reduce their risk of having another heart attack

life is why™

If you recently experienced a heart attack, ask your doctor for a referral to a **cardiac rehabilitation program** near you.
